```

Step 9: GitHub par push karo

</> Bash

```
git push -u origin main
```

Agar GitHub login maange to login kar lo.

Future me jab project update karoge

Sirf ye 3 commands chalengi:

⌕ Bash

```
git add .
```

```
git commit -m "Add login page"
```

```
git push
```

GIT CHEAT SHEET

Case 1: Naya Project (First Time GitHub par Push)

1. GitHub par Empty Repository banao

- ☒ Public/Private
 - ☐ README
 - ☐ .gitignore
 - ☐ License
-

2. VS Code me project folder open karo

3. Commands

`git init` = Repository initialize karta hai.

`git branch -M main` = Current branch ka naam `main` karta hai.

`git remote add origin <Repository_URL>` = Local project ko GitHub repository se connect karta hai.

Example:

`git remote add origin https://github.com/amitScript/Web-Development.git`

`git add .` = Saare new/modified files stage karta hai.

`git commit -m "Initial commit"` = Project ka pehla snapshot save karta hai.

`git push -u origin main` = Project pehli baar GitHub par upload karta hai.

Case 2: Existing Repository me Changes Push Karna

Har baar sirf:

```
git add .  
git commit -m "Meaningful Message"  
git push
```
